

THE BRISTOL BAY BOROUGH WILL BE HOLDING A NAKNEK SEWER IMPROVEMENTS PHASE II ENGINEERING AND DESIGN PRE-BID MEETING / SITE VISIT ON WEDNESDAY, 9/26/18 AT 10:30 AM, PLEASE MEET IN THE BRISTOL BAY BOROUGH ASSEMBLY CHAMBERS, MAIN ST. NAKNEK, AK FOR DIRECTIONS PLEASE CALL 907-246-4224 #308; ALL INTERESTED PARTIES ARE ENCOURAGED TO ATTEND

1. Do you have a summary of the work that has been done on the sewer system since the 2014 Sewer Feasibility Study by ANTHC? Are copies of these drawings available electronically?
They would be made available to you in PDF.
2. Has there been any modification or amendment done to the 2014 Sewer Feasibility Study? No
3. Is there a specific figure or drawing that describes the extent of the proposed sewer main upgrades addressed under Phase II? Only as shown in the Feasibility Study.
4. Is the 17,000 LF of pipe planned under this project to serve new businesses and to replace existing main? The 2014 Feasibility Study recommended that ~3,700 LF of pipe be upgraded. Is the additional piping due to system expansion, capacity upgrade, and/or evidence of further deterioration? All of the above, we currently cannot add services in this area due to high summer flow volume, and the system is aging out.
5. Does BBB have a preference for lift station pumps? ABSCO- Smith and Loveless
6. Who established the SCADA system for the wastewater system? BBB has their own SCADA contractor, the Phase I, Smith and Loveless sub- contractor was used via the general contractor, this will be converted to our SCADA system with our contractor. We prefer it all be tied to our service provider for SCADA.
7. Is survey data available for the entirety of the project alignments addressed by this contract? Original sewer placement survey was done by Coastal Surveyors LLC, for Tryck, Neyman and Hayes, this data is not available but manholes are as built by Coastal, a new survey is required, please see scope of work in RFP.
8. If survey data is not available for portions of the project alignment, does BBB anticipate that the survey for this project will take place in late October / early November? If there is snow on the ground after the contract is awarded, does BBB wish to complete surveying if there is snow on the ground, or divide up the project into phases in order to complete any required surveying at a later date?
Survey in late October early November, we don't get that much snow, generally will be periods of clearing/melting.
9. Is construction funding available for all or part of this project? Does BBB anticipate that the full construction for these improvements will take place in 2019? Not at this time/ hopeful for 2019.
10. Will this project include obtaining needed regulatory approvals from the Department of Environmental Conservation? Yes
11. Is the consultant expected to pay for any design review fees from DEC or any other agency, or would those fees be paid for directly by BBB? Consultant pays fees and gets approval to construct.
Possible future construction administration work associated with construction and record drawings.

12. How is this project being funded? What sources of federal funding are funding this project?
[Unknown at this time.](#)
13. Is the selected consultant expected to perform all required environmental / NEPA / SHPO permitting and associated consultations under this contract, or will this work be done under a separate contract? [Yes](#)
14. Are there sections of the anticipated project alignment that are not covered by existing wetlands mapping that are anticipated to require a wetlands delineation for permitting? [Route is in an established sewer easement along the Alaska Peninsula Highway, no additional wetland delineation for permitting is expected.](#)

We have reviewed the subject RFP and we have two questions:

1. Is there specific hydraulic modeling software used for the existing hydraulic model that ours must be compatible with? If so, please provide the software and compatibility information.
 - No modeling software, this system was done by Tryck Nyman and Hayes originally and was hand rendered on the drawings.
2. Does the preferred 10-page count include the cover sheet?
 - Includes the cover sheet
3. Does the preferred 10-page count include resumes, business license, and evidence of insurance, or can these items be provided as appendices?
 - All items in #3 can be submitted in addition to the 10 pages, as appendices.

Do you foresee an extension on the proposal due date based on the recently scheduled site visit?

- At this time there is no foreseeable extension for the proposal due date.

Is it possible to obtain copies of the Leader Creek Sewer Project Design drawings and record drawings (c.1993-1996) Phase I Sewer Improvements record drawings (c. 2017-2018) and the ANTHC Naknek Sewer Feasibility Report (c.2015)?

- All drawings in the Borough Archive will be available to view at the Pre-Bid Meeting

For additional questions please contact roy@bbbak.us

ANTHC Sewer Feasibility Study will be attached to this email.

If you have any problems opening the file please email bsavo@bbbak.us
